

Understanding the Defense Healthcare Management Systems Program Executive Office Landscape

The mission of the Defense Healthcare Management Systems (DHMS) Program Executive Office (PEO) is to efficiently improve healthcare for the active duty military, veterans, and beneficiaries by modernizing the Electronic Health Record (EHR) for the Military Health System and establishing seamless medical data sharing between the Department of Defense (DoD) and Department of Veterans Affairs (VA), and the private sector.

STRUCTURE OF THE ORGANIZATION

WHY ARE WE HERE?

EHR modernization and interoperability requires collective support from and collaboration with a number of stakeholders. Strategically aligning different organizational visions and goals creates guiding principles for success and provides a path forward for achieving interoperability.

MHS Quadruple Aim | VHA Blueprint for Excellence | ONC Interoperability Roadmap

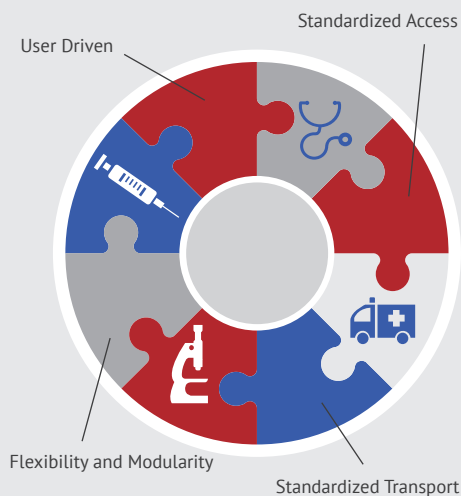

EHR GUIDING PRINCIPLES

- Standardization of clinical and business processes across the Services and the MHS
- Design a patient-centric system focusing on quality, safety and patient outcomes that meet our readiness objectives
- Flexible and open, single enterprise solution that addresses both garrison and operational healthcare
- Clinical business process reengineering, adoption, and implementation over technology
- Configure not customize
- Decisions shall be based on doing what is best for the MHS as a whole – not a single individual area
- Decision-making and design will be driven by frontline care delivery professionals
- Drive toward rapid decision making to keep the program on time and on budget
- Provide timely and complete communication, training, and tools to ensure a successful deployment
- Build collaborative partnerships outside the MHS to advance national interoperability
- Enable full patient engagement in their health

INTEROPERABILITY

Stakeholders have agreed upon three principles to expand interoperability beyond the current state:

- Engage the Private Sector
- Continue to partner with the Department of Veterans Affairs
- Collaborate with ONC on Data Standards

2013

iEHR shift: DoD and VA announced they would pursue separate paths to obtain interoperable and modernized EHRs. As a result, the DoD decided to pursue a competitive acquisition

DoD restructured iEHR program into Defense Medical Information Exchange (DMIX) to support seamless data exchange; the Defense Healthcare Management System Modernization (DHMSM) to oversee modernization; and the DoD/VA Interagency Program Office (IPO) to lead health data interoperability standards

2014

Mapped DoD/VA data to standard terminology for most commonly used clinical data elements

Final DoD EHR Request for Proposal (RFP) released

Final responses received and RFP review process begins

Updated Joint Legacy Viewers (JLV) and improved exchange of patient data between the DoD and VA

Expanded access of DoD patient data between VA and private sector partners

2015

DMIX ongoing improvement of data exchange and infrastructure services

Update JLV viewers to enhance system functionality

DHMSM contractor award

Support Office of the National Coordinator for Health IT (ONC) planning for national interoperability policy

2016

Begin EHR Initial Operational Capability (IOC)

System deployment with integrated data sharing techniques

Defense Healthcare Management Systems (DHMS)

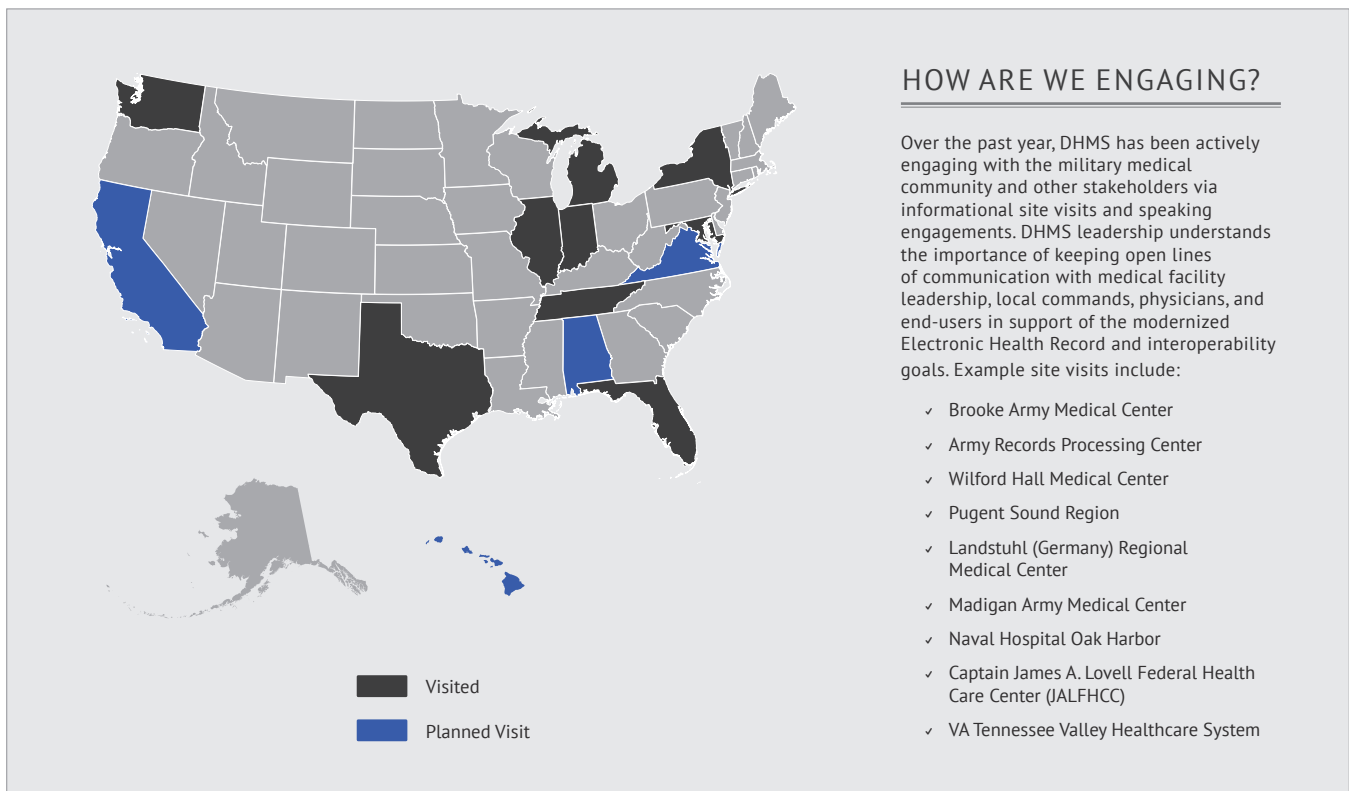

Mr. Christopher Miller, SES DoD, Program Executive Officer
Ms. Mary Ann Rockey, SES DoD, Deputy Program Executive Officer
COL Nicole Kerkenbush, U.S. Army, Military Deputy Program Executive Officer

Accomplishments to date

- ✓ Visited with commercial and military health facilities to identify leading practices in EHR acquisition and deployment
- ✓ Engaged internal and external stakeholders via speaking engagements and conference participation
- ✓ Updated DHMS strategic plan and business processes to align program goals
- ✓ Chartered program offices to support EHR business and functional operations for both garrison and operational environments

FY15 Objectives

- Empower healthcare providers and support world class health care delivery
- Enable seamless data sharing among all healthcare providers
- Bridge IT gaps between systems
- Influence the development and adoption of national standards and policy for Electronic Health Records and health data
- Foster a talented, adaptive, empowered, and diverse staff
- Institutionalize lean, consistent, transparent, end-to-end internal DHMS processes

DHMS PROGRAM OFFICES

Defense Healthcare Management System Modernization (DHMSM)

Mission: Competitively acquire, test, deliver, and successfully transition to a state-of-the-market EHR system

Defense Medical Information Exchange (DMIX)

Mission: Provide technical solutions for seamless data sharing and interoperable EHRs that evolve with national standards

DoD/VA Interagency Program Office (IPO)

Mission: Lead and coordinate DoD and VA adoption of and contribution to health data interoperability standards

Joint Operational Medicine Information Systems (JOMIS)

Mission: Support the planning, procurement, and deployment of the new EHR and follow-on theater capabilities to DoD expeditionary locations
